The TIME for a new approach

Do you **Really** know what's going on in your Data-Center Infrastructure?

Are you **Sure** you used all available Data-Center Infrastructure resources?

Are you **Convinced** you can support company business strategy?

Are you **Ready** for the next step?

IT Analyzer Technologies is the pioneer of Business Intelligence and DSS solutions, empowering IT managers to control and maximize DC assets.

IT Analyzer is helping Data Center managers "see the forest from the trees", by providing a Business Intelligent platform as a layer on top of existing tools. IT Analyzer analytics engine and role-based dashboards allow IT Managers identify trends and isolate issues not visible with existing tools. IT Analyzer is a necessary building block in creating an optimized Data-Center operation.
